ACTION

With a Data Cloud implementation, healthcare organisations can elevate their patient and member experience for the digital economy as well as improve operational efficiency with greater speed to insights and actions. Data Cloud enhances and personalises customer data for a unified view of all relevant information in a central location. This leads to better managed privacy and compliance within the technical landscape, more efficient marketing and advertising campaigns always on the pulse of target audiences, real-time decisioning, and a sure foundation to utilise generative AI use cases for patient interactions that impress and delight.

DATA CLOUD BENEFITS BY PERSONA

Patients

Receive personalised care through predictive analytics with a unified view of health records, improved health outcomes, and overall satisfaction from a seamless experience.

Care Managers

Leverage proactive health management with real-time data to identify and support at-risk patients early, ensuring efficient coordination within care teams for timely care delivery.

Sales Agents

Enjoy enhance engagement with members through data-driven insights, streamlined operations with automated tasks and integrated data, and more time to concentrate on relationship building for sales.

Brokers

Make data-driven decisions with access to analytics, market trends, etc. This enables brokers to give tailored advice to clients with elevated market insights to strategically position themselves to seize new opportunities.

HOW TO GET STARTED

Simplus can perform a strategic assessment within two weeks to craft a tailored pathway toward Data Cloud for your organisation. This encompasses identifying use cases and architectural design as well as preparing a pragmatic project plan to lay the foundation for a data-driven revolution.

DELIVERABLES

- **Use Cases and Business Value:** A curated list of practical use cases paired with an analysis of potential value and benefits
- **System and Data Architecture:** A detailed depiction of the proposed system and data architecture for a clear vision of how Data Cloud will integrate with and enhance your existing ecosystem.
- **Initial Project Plan and Budget Proposal:** Outline of initial steps, milestones, timelines, and a comprehensive estimation of the resources and investment required for successful Data Cloud implementation.
